Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Status

Claims 13 and 16 remain pending.

Claim 14 has been canceled.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Response to Arguments

The Applicant's arguments filed on November 22, 2004 have been fully considered but are not persuasive in view of newly discovered references Schumacher (US Patent 4,942,527)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Srinivasan (US Patent 5,548,506) in view of Nummelin et al (US Patent 6,308,164).

As per claim 16,
Srinivasan ('506) discloses a method of reviewing tasks, comprising;
comparing a current task for the person in charge of the tasks to he stored
completed tasks for the person in charge of tasks. (Figure 9)
providing a reviewer for the current task the review information for similar
completed tasks.(Figure 7)

Art Unit: 3621

Srinivasan ('506) does not explicitly disclose "storing review information with respect to reviews of completed tasks associated with a particular person in charge of tasks" Nummelin et al ('164) discloses "storing review information with respect to reviews of completed tasks associated with a particular person in charge of tasks". (Column 7, lines 24-37) It would be obvious to one having ordinary skill in the art at the time the invention was made to combine the Srinivasan ('506) method with the Nummelin et al ('164) method in order to analyze the efficiency of task execution.

Srinivasan ('506) does not explicitly disclose "the stored review information including a user identifier requesting an authorization and/or repudiation reasons." Schumacher ('527) discloses "the stored review information including a user identifier requesting an authorization and/or repudiation reasons". (Figure 4b) It would be obvious to one having ordinary skill in the art at the time the invention was made to combine the Schumacher ('527) method with the Nummelin et al ('164) method in order to profile system usage by user.

Allowable Subject Matter

Claim 13 is allowable over the prior art record.

Conclusion

Examiners note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.
